SKIMMER

UPGRADE

March, 2023

INVINCIBLE

1

65% increase in air space

Compared to Ver.2, the volume of the Neo-Skimmer Invincible's air pocket is increased by about 65%.

Therefore,
the floating part does not sink for a longer period of time and removes the oil film stably.

Neo Skimmer
Ver 2

Neo Skimmer
Invincible

2

Add suction prevention net

You can install a **simple prevention net** in the floating part where the oil film is removed. This prevents shrimp, small fish, from being sucked into the skimmer.

3

Prevention net installation can be selected

Prevention net can be **detached** as needed.

Therefore, if you want a stronger oil film removal, you can use it without net. Due to the increased air space, even if net is installed, the neo-skimmer will not sink for a long time and will operate reliably.

Price and composition

If you order NeoSkimmer and Premium Flow in the future, the Invincible version will be provided as a standard and the price will be the same as before.

The floating part of the Neo-Skimmer Invincible (including two prevention nets) is sold separately and is priced at 1.5usd or 1.4euro.

It is only available for version 2 (not available for version 1) and both M and L sizes are available.
